Autism Spectrum Disorder:

Police Officer Strategies for Interaction, Response & Safety

Thursday, November 10, 2016 -- 9AM to 3PM

*Instructors: Adrienne Robertiello, Autism Educator, Children's Specialized Hospital
Officer Joseph Carratella, Elizabeth Police Department*

The CDC estimates the current prevalence of autism spectrum disorder (ASD) in the United States at 1 in 68, with New Jersey reported as having the nation's highest rate at 1 in 45. It is critical that officers have ample knowledge of ASD as they are likely to encounter those with the disorder in the course of public safety efforts, crime prevention and response, and general community interactions. This course supplements the *New Jersey Developmental Disabilities Awareness Training for NJ First Responders* which is mandated by Public Law 2008, Chapter 80. Participants will obtain comprehensive information about individuals with ASD including communication, social skills, sensory issues, unpredictable responses, meltdowns, self-injurious behaviors, aggression, reduced understanding of danger, and more. The presenters will provide strategies for interacting and responding to calls related to those who may have this disorder, methods to address safety challenges, and tools to develop community relationships to aid in the prevention of negative outcomes and injuries. Topics will include recognizing characteristics of ASD; personal and community safety; modified response techniques; neglect, abuse, bullying, and harassment; crisis intervention; transportation, travel, and vehicular safety; medical emergencies; search and rescue, and emergency management.

Budgeting for Law Enforcement Agencies

presented by Penn State University's Justice & Safety Institute

Thursday/Friday, May 5-6, 2016 -- (TWO DAYS) 8:30AM to 4:30PM

Instructor: Penn State University's Justice & Safety Institute

Budgets are one of the most important development tools an agency can use. There are many challenges related to planning, managing, and presenting a department budget. A department's ability to reduce crime and improve services can be negatively impacted by a lack of funds. The *Budgeting for Law Enforcement Agencies* course will provide police departments with the ability to address external concerns, such as fighting new crimes, along with internal concerns, such as training officers and purchasing new equipment, which are directly correlated to constructing and managing the phases of your budget. The Penn State Justice and Safety Institute (JASI) is pleased to work with our co-sponsor, to offer this two-day course. This program combines lectures with demonstrations that will help participants to understand, develop, present, and manage an agency budget. This course is highly interactive and is applicable work-based training. Participant learning is reinforced through the extensive use of hands-on individual and team exercises during the course. Note that effective budgeting skills will allow you to advocate for the funds that your department needs, and also to ensure that those funds are deployed wisely. All of our courses are instructed by current practitioners or recently retired executives. Key concepts and topics include, but are not limited to, the following: **Understanding your Budget** including Budgetary systems: types and applications; **Developing your Budget** including budget terms, framework, and structure; Planning, pricing, controlling, evaluating, and monitoring budget; **Building a budget**; Analyzing past budgets and Planning new budget and costs; **Managing and Monitoring your Budget**, including factoring for maintaining and developing capacity, while considering recruitment, retention costs, and community; and **Presenting your Budget**, including acquiring needed skills to present to decision makers in a very tight economy.

**Bullying, Bias, and Racial Disparities in Discipline:
After Five Years with the “Anti-Bullying Bill of Rights,”
What Do We Know about Creating Safe and Equitable School Climates?
Wednesday, January 20, 2016 -- 9AM to 4:30PM**

SNOW DATE: Friday, January 22, 2016 -- 9AM to 4:30PM

***sponsored by the Union County Human Relations Commission, Union County
Prosecutor’s Office and Union County Superintendent of Schools***

*Instructor: Dr. Paula C. Rodriguez Rust, Educational Consultant and Trainer
Owner, Spectrum Diversity LLC*

This workshop highlights the critical importance of proactive efforts to address various forms of bias as part of comprehensive anti-bullying programming, promoting equity in education, and complying with laws such as the Anti-Bullying Bill of Rights, the NJ Law Against Discrimination, and Title IX.

General efforts to promote a positive school climate, included in many anti-bullying program packages, might fail to effectively address specific biases in the school environment that give rise to HIB incidents and disparities in academic opportunities for students with different racial, cultural, religious, socioeconomic, etc., backgrounds. Recently publicized findings regarding racial disparities in discipline in New Jersey schools are one example of the types of inequities that result when the various sources of bias in a school environment are not fully understood and addressed. However, each form of bias/diversity (ethnic, religious, disability, socioeconomic status, sexual orientation, gender identity and expression, etc.) poses unique challenges in the school environment.

This workshop will explore (1) the central role of bias in defining statutory HIB, and practical solutions for common difficulties that arise in ABR implementation, (2) a checklist for identifying potential disparities in the school environment ranging from discipline, to course placement, to school club involvement, (3) tools to help identify the potential sources of disparities, including psychological, social, cultural, and structural factors, both inside and outside the school, (4) strategies for preventing disparities and addressing biases in the school environment, and (5) basic training in cultural competence, including an understanding of microaggressions which are shown by research to contribute to disparities in academic performance.

The workshop includes a special segment on recent developments with regard to school’s responsibilities vis-à-vis LGBT students.

This workshop is appropriate for school administrators, and instructional and non-instructional professional school staff, including AAOs, ABSS, ABCs, SST members, guidance counselors, as well as professionals in related fields including School Resource Officers, Municipal Bias Officers, psychologists, and clinical social workers.

PDU credits will be given to attendees.

Community Policing Train The Trainer: Police & Teens Together (PATT) Program Tuesday, March 8, 2016 -- 9AM to 4PM

*Instructors: Lt. Theresa Gazaway and Sgt. Dennis Carovillano, New Providence Police Department
Karen E. Positan, Assistant Public Information Officer, Union County Prosecutor's Office
& Union County Human Relations Commissioner*

Certain police procedures carried out as part of normal investigations, police stops and questionings can easily be misunderstood by citizen residents, and can therefore result in confrontation and dispute. These misunderstandings in turn can escalate into various levels of criminal offenses which otherwise were not the purpose of the original stop and investigation. In 1999, amidst a national controversy surrounding events much like today's headlines about Ferguson, North Carolina, and Miami, Union County Human Relations Commissioners agreed that steps needed to be taken to forestall these scenarios from occurring whenever possible.

In Spring 2000, the Union County Human Relations Commission and law enforcement community piloted the four-session Police & Teens Together (PATT) Program, and since then have delivered it at every Union County high school with excellent results and documented success. The simple format provides an open forum for teens and police to share concerns and upsets, ask questions, exchange viewpoints, and "trade places" in a dynamic role play scenario that delivers impactful results in a fun-filled educational setting, with the benefits of the students sharing their "lessons learned" with classmates, friends and family.

Officers who deal with juveniles, community policing and school resource officers are invited to learn how to implement this user-friendly program in your high schools, to increase the level of respect and cooperation and add "voices of reason" that can be heard in your schools and community.

Document Fraud for Law Enforcement including Facial Recognition Technology

Wednesday, March 30, 2016 — 9AM to 4PM

*Instructor: Lt. Mark Cushing, (ret.) New Jersey State Police
Investigator for the New Jersey Motor Vehicle Commission Document Fraud Unit*

This course will enhance the ability of patrol officers and detectives to recognize and identify the universe of identity-related documents issued by and relied upon by the Motor Vehicle Commission (MVC) and the factors that motivate fraudsters. With emerging technology it has become increasingly difficult to identify fraudulent documents. Officers will learn what tools are available to assist them in identifying counterfeit documents by providing “hands on” training and experience in recognizing fraud as it pertains to documents including driver licenses, green cards, passports, birth certificates and social security cards. Participants will learn the newest trends in the counterfeiting of drivers licenses by “online” manufacturers, which has becoming increasingly common due to the ease in obtaining access to technologies. This course will also review counterfeit as well as genuine NJ inspection stickers, temporary registrations and certificates of title.

This class will also review facial recognition technology as it is used by the Motor Vehicle Commission on all images captured -- including the process that is used to submit a photo for a “manual upload”. This course will inform students of a cutting edge investigative tool available at the New Jersey Regional Operations Intelligence Center (ROIC). Known as the “Facial Recognition Initiative”, this technology utilizes the Photo Imaging Mugshot System maintained in the New York/New Jersey “HIDTA” program. The repository consists of images from arrested individuals submitted by various law enforcement agencies from New Jersey, New York and Pennsylvania. Currently, MVC staff highly trained in the field of facial recognition has been assigned to the ROIC to assist in this endeavor. Along with the instruction, the students will receive reference material to assist in investigations.

Mark Cushing is an investigator with the New Jersey Motor Vehicle Commission's Fraudulent Documents Training Unit in Trenton, N.J. His current duties consist of those related to forensics document examination and document fraud training. Prior to his current assignment he was assigned to the Facial Recognition Program where he conducted investigations of individuals found to have multiple identities for various reasons, including but not limited to MVC suspensions, immigration issues, homeland security threats, and access to unauthorized government subsidies. During his tenure with the New Jersey State Police he successfully led and conducted thousands of auto theft, document fraud, and insurance fraud official investigations. He acted as subject matter expert and lead instructor/facilitator to federal, state, county and local law enforcement schools in auto theft, vehicle identification and alteration, document fraud and insurance fraud investigations. Additionally, he provided informational support to field detectives and acted as a liaison to out-of-state Motor Vehicle Offices and all other agencies entitled to vehicle history information from New Jersey.

Monday/Tuesday, March 14-15, 2016 -- (TWO DAYS) 8:30AM to 4:30PM

Instructor: Penn State University's Justice & Safety Institute

The impact and reach of any police report is often underestimated. Many officers think that reports begin and end at their departments. The opposite is true. This powerful two-day program is designed to help law enforcement write reports that will help, not hinder, the criminal justice system. This highly interactive program places an emphasis on imparting the knowledge and skills needed to properly develop and/or review effective reports. All of our courses are instructed by current practitioners or recently retired executives. Key concepts and topics include, but are not limited to, the following: **Strategies to make written reports simple**, easy-to-read and understandable; Making reports fact-laden; Develop Professional Standards; Create consistent review standards including writing styles to increase consistency, training tactics and strategies, essential grammar basics, including spelling and punctuation and chronological, past tense and first-person emphasis. Field Training Officer

presented by Penn State University's Justice & Safety Institute

Monday through Wednesday, November 14-16, 2016

-- (THREE DAYS) 8:30AM to 4:30PM

This powerful three-day program is designed to prepare officers for field-training responsibilities. The future of a police department is significantly impacted by the field training officer (FTO). The FTO is a vital member of the department, responsible for training new recruits and determining the viability of these recruits as law enforcement officers. When FTOs are properly trained, they can help make sound personnel decisions and avoid future performance and legal issues. Rather than using a previously formulated method of instruction, we teach what we believe to be the best of each method, and then allow trainees to devise their own program. This highly interactive class places an emphasis on imparting the knowledge and skills needed to properly train and mentor recruits for work as law enforcement officers. All of our courses are instructed by current practitioners or recently retired executives. Key concepts and topics include Elements of the Communication Process, Adult Learning Concepts, Concepts of Appraisal, Evaluating Training Performance, Ethical Issues, and Job-Task Analysis and Patrol Function.

Wednesday/Thursday 8AM to 5PM; Friday 8AM to 12 Noon.

Instructor: TEEX/NERRTC

IS-800.b: National Response Framework (NRF), An Introduction;

IS-100.b: Introduction to Incident Command System; and

The course expands upon information covered in Introduction to Incident Command System (ICS-100) and ICS for Single Resources and Initial Action Incidents (ICS-200). Topics covered in the course include ICS staffing and organization, reporting and working relationships and information flow, transfer of command, unified command functions in a multi-jurisdictional or multi-agency incident, ICS forms, resource management, and interagency mission planning and procurement.

At the conclusion of the course, participants will be able to describe how the NIMS Command and Management component supports the management of expanding incidents, and the incident/event management process for supervisors and expanding incidents as prescribed by the Incident Command System (ICS); implement the incident management process on a simulated expanding incident; and develop an Incident Action Plan for a simulated incident.

Mandatory Gang Awareness for Union County Educators
Open to All Public and Non-Public School Personnel
Monday, January 11, 2016 -- 8AM to 12 Noon
SNOW DATE: Thursday, January 14, 2016

Instructor: Detective Gary Webb, Union County Prosecutor's Office

This course, which is open to all PUBLIC and NON-PUBLIC School Personnel, responds to the state-legislated mandate (set forth in S-1748) that requires public school administrators to attend a mandatory gang awareness seminar. This legislation requires the Attorney General, in coordination with the Commissioner of Education, to develop seminars to teach school administrators to recognize signs of gang involvement or activity. The new law also requires that a seminar on gang awareness be held annually in each county for all public and nonpublic school administrators.

Schools and the community at large may not be aware of how to recognize the existence of gang activity, which drastically increases the gang's ability to thrive and develop a power base through your community. The purpose of this training is to increase educators awareness and understanding of gangs, and understanding of the warning signs of gang membership. Additionally, administrators will also learn why kids join gangs, what educators can and should do when you recognize the presence of gang activity, and what parents can do regarding prevention and intervention, which educators can then share with their broader school community.

Attire: Professional/Business Casual.
(Dress code will be enforced. Denim/jeans/tshirts/sneakers are not permitted.)

The "principle-based" concept identifies a problem or action and then concentrates on easily-identified principles to define or solve the problem. This method of training allows for flexibility when trying to "meld" this program with the many systems already established within the law enforcement defensive tactics field. It is also designed to accentuate and compliment the Monadnock Expandable Baton (MEB) and PR-24 Control Baton Programs. The MDTS Program will cover basic blocking skills, counter-strikes, control holds, handcuffing and weapon awareness/reaction.

Instructor: Officer Jason McErlean, Westfield Police Department

The class is designed for all members of the law enforcement community. Suicide by Cop is becoming a reoccurring event in New Jersey. A Brief History of the John H. Stamler Police Academy

The Union County Police Chiefs Association founded the Union County Police Academy in 1946. Since that time, the Police Academy continually operated at various sites throughout Union County, producing qualified law enforcement officers for municipal, county and state agencies.

The Basic Police Training curriculum meets the strict requirements of the New Jersey Police Training Commission. The instructional staff is comprised of experts in various areas of law enforcement, thus assuring the academy graduates have the desire, ability and judgment to serve the public and honor their oath of office.

Since July 1986, the Union County Police Chiefs Association forged a "Unique Partnership" with the Union County Prosecutor's Office in the overall operation of the Police Academy. This enabled broader opportunities for the basic and in-service training programs, and ensures maintaining the highest standards of training, competence and professionalism. It is the totality of this "Unique Partnership" that produces successful law enforcement officers to protect and serve our citizens, and provides continual education to assist them in honing their knowledge and skills. Two former prosecutors were instrumental in working closely with the Police Chiefs to form this endeavor: the late John H. Stamler and the late Andrew K. Ruotolo, Jr.

In March 1989, construction began on a permanent home for the Police Academy, located on the grounds of the Union County Vocational-Technical School in Scotch Plains. The present state-of-the-art facility was dedicated on November 18, 1991, and named the John H. Stamler Police Academy of Union County, in honor of the late Prosecutor whose vision and determination served as the catalyst for bringing this project to fruition.

The new Academy officially opened its doors for operation and greeted the members of the 66th Session of the Basic Police Training Class on January 31, 1992. The Academy is offered without a fee to all Union County law enforcement agencies.

Acting Union County Prosecutor Grace H. Park and the Union County Police Chiefs Association, through its Education Committee, work closely with the Academy staff to continue the tradition of high standards of quality education that has become the hallmark of the Academy.

Chief Anthony Buccelli of the New Providence Police Department serves as Superintendent for the Police Academy; Eric G. Mason is the Police Academy Director.
