- C. The sequence of the project will be that all roadway plantings be addressed first followed by the planting of trees in the general parks.
- D. Planting location of the trees will be the responsibility of the owner. The landscape contractor will coordinate with the owner’s representative prior to planting.

1.2 Standards

- A. All plant material will conform to the current issue of the American Standard for Nursery Stock published by the American Association of Nurserymen.

1.6 Substitution: Post-Bid

- A. If a substitute is selected, it must be approved by the owner's representative prior to award of contract.

- B. Private utilities, including communication lines, etc., will be located by the owner.
- C. If there is a conflict with the utilities and the planting, the owner will be responsible for alternate location prior to the planting process. Any cost due to relocating after planting will be borne by the owner.

1.8 Concealed Contingencies

The correction of undisclosed subsurface conditions such as rock, roots, stumps, water, clay pan, soils contaminated with toxic substances or other obstacles encountered in excavation work, which are not apparent at the time of estimating, will result in additional costs to the owner. Upon discovery of undisclosed conditions, the landscape contractor will notify the owner, for written approval, before corrective measures are taken.

1.9 Workmanship

- A. During delivery and installation, the landscape contractor will perform in a workmanlike manner, coordinating activities so as not to interfere unduly with the work of other trades and leaving work areas clean of litter and debris at the close of each workday.

Where existing trees are to be preserved, additional precautions should be taken to avoid unnecessary accumulation of excavated materials, soil compaction or root damage.

Inspection: A verification of performance for work by contract documents, to be conducted by the owner's representative on site and in the presence of the landscape contractor for the purpose of acceptance. During inspection for initial acceptance, the landscape contractor should have an acceptance form to be signed by the owner or owner's representative.
- B. Initial Acceptance: Acceptance can be on partially completed work under the contract, if approved by the owner. If, for reasons beyond the landscape contractor's control, work has stopped, inspection will be made on partially completed work. Warranty will begin after landscape inspection and acceptance.

- C. The determination will be made by an owner's representative experienced in Horticulture or Forestry.

1.13 Replacements and Conditions

- A. Replacement will be made during the following planting period unless the landscape contractor agrees to an earlier date.

2.0 PLANT MATERIALS

2.1 Scope of Work

The landscape contractor will be responsible for furnishing and installing all plant material shown on the plant list, as submitted with the contract. The landscape contractor will have investigated the sources of supply and satisfied himself/herself that he/she can supply all the plants specified on the drawings in the size, variety and quality noted before submitting the bid. Failure to take this precaution will not relieve the successful bidder from the responsibility for furnishing and installing all the plant material in strict accordance with the contract requirements and without additional expense to the owner. On the other hand, if proof is submitted that any plant specified is not obtainable, a proposal will be considered for use of nearest equivalent size or variety with an equitable adjustment of contract price. Such proof will be substantiated and submitted in writing to the owner.

2.2 Standards

- A. Plants will be in accordance with the current American Association of Nurserymen's Standards and conform in general to representative species.
- B. Balled and burlapped (B&B).

For multiple-trunk trees, height measurement will take precedence over caliper.
- C. All plant material will be nursery-grown unless otherwise specified. Pruning will be done as per specifications. (See Section 4.3 K).

- C. State nursery inspection certificates will be furnished to the owner upon delivery.

TREE STAPLE™ below grade stabilizing system

Installation Instructions

Dig Safely. Please comply with "Call Before You Dig" law requiring utility markouts; the national telephone number is 888-258-0808. Always wear appropriate safety attire, including protective eyewear.

1. Leaving burlap intact, heel the plant's root ball into place.
2. Remove plastic safety caps from Tree Staples™ and set aside.
3. Set each Tree Staple™ opposite the other and against the outside edge of root ball. The shorter prong should be positioned over root ball, halfway between the trunk and the ball's outer edge.
4. Using a sledgehammer, drive each Tree Staple into the ground until the cross bar is recessed one to two inches below the surface of the root ball. You can alternate between hitting either of the prongs to insure that the Tree Staples are completely below-grade.
5. Place safety caps on exposed ends.
6. Cut back burlap, leaving material under cross bars.
7. Fill and finish planting using best practices.

At your discretion consider increasing the size or number of stabilizers when:

- Extreme wind conditions persist,
- The tree's size requires greater holding power
- Soil is sandy or loose
- Root ball is small relative to canopy or tree size, (palm trees).

Loose Root Ball or Container Stock:
a simple and effective solution to use when working with container stock or loosened B&B material:

1. Follow steps 1, 2, & 3 in Installation Instructions, changing the position of the short prong to the outside edge of the rootball.
2. Tie common burlap tree wrap (3"-5" width) to the crossbars on each side of the trunk. Leave about 2"-3" of play in the straps. Keep straps away from the trunk
3. Proceed with installation instructions, step #4.
