CITY OF ELIZABETH AWARDED \$5 MILLION FOR FERRY TERMINAL

Grant among 166 Projects to Modernize
Transportation Across the Country from
the U.S Department of Transportation

The U.S. Department of Transportation awarded more than \$2.2 billion from the Rebuilding American Infrastructure with Sustainability and Equity (RAISE) program to help urban and rural communities move forward on projects that modernize roads, bridges, transit, rail, ports, and intermodal transportation. This planning grant will assess the feasibility of a ferry terminal to be located at the Elizabeth waterfront that will support a ferry service from Elizabeth, NJ to Manhattan.

The study will explore viable service locations at the municipality's waterfront, required infrastructure and supportive services, as well as include alternatives to promote energy efficiency. The benefits of this project include creating transportation choices for individuals by providing a direct over-water connection to New York City and New Jersey. The project seeks to incorporate electric vehicle infrastructure which will reduce emissions and ease congestion by providing a new transportation option.
